- 7.2. **THE COMPANY SHALL NOT BE RESPONSIBLE AND WILL NOT COMPENSATE YOU FOR ANY LOSSES CAUSED BY ACQUIRING THE NFT TOKENS, AS WELL AS BY TRANSMITTING DIGITAL ASSETS, VIRTUAL ASSETS, AND FIAT CURRENCY TO ANY ADDRESSES AND(OR) BANK ACCOUNTS NOT DIRECTLY PROVIDED WITHIN THE SITE.**
- 7.3. Below, We listed some general risks You should remember when acquiring Our NFT Tokens. Please note that the list below is incomplete, and You should study the Site and other sources about Digital Assets before acquiring Our NFT Token.

Volatility

The Digital Assets have high volatility (i.e., value can increase and decrease significantly in a very short period and at any given moment). The value of Digital Assets depends on a demand that may be influenced by many factors, including loss of confidence in the (crypto) currency, changes in software development, government decisions, creation of a competitive (crypto) currency, technical problems, political or non-political statements, statements of influencers and news, and hacker attacks. Fluctuations in the price of the Digital Assets could materially and adversely affect the value of Your NFT Tokens, which may also be subject to significant price volatility.

A Lack of Use or Public Interest

There are many factors that could negatively impact the development and operation of the Site and, therefore, the potential utility or value of NFT Token.

No Governmental Backing of Digital Assets

Generally, Digital Assets are not backed by the government or their issuer. Therefore, they have special risks that are not generally shared with the official currencies because they are not issued by governments or backed by commodities or goods that are tangible or registered in the official registry. Digital Assets are intangible, decentralized, and backed only by technology and trust. No central bank or other institution can take any measures to protect the value of Digital Assets.

Regulatory Changes

The regulatory regime governing blockchain technologies, cryptocurrencies, tokens, including but not limited to NFT Tokens, is uncertain, and new regulations or policies may materially adversely affect the development of the Site and Project and, therefore, the potential utility or value of NFT Tokens. The negligence in terms of the initial review of Your local legislation and further amendments of such regulation may cause the infringement of the relevant legislation and(or) forced sale of the NFT Tokens and(or) payment of the fines.

Security System

Your access to the Digital Assets and NFT Tokens depends on Your access to the login-password pair and(or) seed phrase and(or) other identity verification means introduced within Your crypto wallet (e.g., email). It may be exposed to situations out of the crypto wallet provider's control, where You forget the login and(or) password, disclose the login-password pair and other identification details to third parties, lose devices with the login and(or) password, and similar risks. Moreover, We do all possible to provide and enhance security systems of the Site. Nevertheless, there are remain risks that Site security could be breached, and third parties can get access to Your information and NFT Tokens.

Third Parties Fraudulent Practices

We do everything possible to combat the third parties' systems that may copy the Site and(or) communication means to access the login-password pair and(or) other identification means to access Your crypto wallet. Such information is the key means to verify an individual's identity using the wallet. Where third parties use such data, it is next to impossible to prevent their access before the loss of Digital Assets.

- 7.4. Considering the aforementioned, **WE STRONGLY ADVISE YOU DOING THE FOLLOWING:**
- (a) To study all information related to the background of the NFT Tokens and Digital Assets that We accept in consideration for the NFT Tokens before their acquisition;
 - (b) To keep Yourself updated on the NFT, NFT Tokens, and Digital Assets market processes during the whole period of their holding;

 - (d) Be careful and keep Your login, password, and other authorization means for Your crypto wallet for Yourself, as well as change them regularly;
 - (e) To use all possible means of authentication provided by the crypto wallet provider;
 - (f) To verify the correspondence of the email address and other contact details with those provided in present Terms and(or) within the Site every time during communication with Us before any response.
